Dear Parent or Guardian,

Please Remember!

Your child needs to have a Health Exam before entering First Grade!

You will need to present a report of your child's examination to the school on or before his/her first day of entering the first grade, or your child will be unable to attend. This examination can be done up to 18 months before your child goes into first grade.

Health examinations help to find health problems that may keep your child from doing well in school. Health problems that are found early are easier to correct. Your own doctor can give your child this examination, or you can call the Merced County Health Department at (209) 381-1125 and inquire about CHDP Providers. If you have questions regarding this matter, please call your child's school.

We wish your child success in the coming school year.

Sincerely,

Diane Gannon

District School Nurse
